

Welcoming New Employees

Ms. Hira Khan joined as Professional Assistant to the CFO in the Finance Department. She has prior related work experience in some of the leading Telecom Operators.

Ms. Hina Bangash has recently joined MOL Pakistan in the capacity of an Integration Officer in the Community Development Department (CORA CD), and will be dealing with the different facets of community development and social integration. She has to her credit 6 years of prior work experience in different sectors of the government.

We welcome them on board and wish that their stay here at MOL promises to be an exciting experience.

Good News!

The recent upset in the flare system at the Gas Processing Facility had raised concerns for the company on all fronts. Maintaining an intricate balance between promptness and compliance with HSE protocols, the Productions Department was able to complete the gargantuan task of recommissioning the plant on 15th September, 2015. The facility is up and running as smoothly as it was previously, thanks to the unwavering commitment and diligence of the Productions Department and the support function for the round the clock support during this time.

The CORA Communication team at MOL Pakistan just wrapped up the shooting of a video, documenting HSE standards for drivers. The entire film was shot in the rugged terrain of Manzalai. The purpose of the video is to raise awareness levels of the bowser drivers both on the wheels & off the wheels for their own safety & safety of all they come across. Personnel at the field were very welcoming and helped throughout the shooting of the video. The drivers also patiently retook several shots to make the clips appear seamlessly strewn into the entire film. The entire process was very hands-on for the team members, while they learnt the intricacies of the local jargon, making the entire experience fascinating. Details will be captured in the next issue of Panorama.
